

**Amendments to the Specification**

The following paragraph numbers refer to the published patent application Publication US 2007/0272765.

Please replace paragraph [0004] with the following amended paragraph:

[0004] According to the invention this objective is reached by providing an aerosol can 40 comprising a body 38 containing a propellant as well as an aerosol product 39, a valve whose actuation enables said aerosol product to be sprayed, and a spray head which serves to discharge the aerosol product to the environment when the valve is actuated, said spray head having an axial borehole through which the aerosol product enters the spray head, and being provided with an additional adjustment device for the discharge rate to be regulated.
